Problem: Hospital

Your city's Hospital is outdated; a decision was made to demolish it and start over. Design a hospital for your city with a population of 30,000 people.

Specifications

- Area for ambulance to park and drop off
- Large welcome area and waiting room
- Patients rooms
- Free clinic
- Emergency rooms
- Operating rooms
- Doctor Offices

Keep in mind this hospital needs to be large enough to accommodate the size of the town and surrounding area.
